# Alerts are Smart. Solutions are Smarter.™

Enercare Smarter Home is a simple, integrated system that puts home comfort and peace of mind in the palm of your hand, even when you're not at home.

And unlike other available smart home systems, Enercare Smarter Home goes beyond notifying you of any issues. From automated solutions within the app, to responsive technicians you can contact to fix the issue, Enercare Smarter Home is the most complete solution for your home.

## With an Enercare Smarter Home you'll get:

- Management of all Enercare Smarter Home products using one simple mobile app
- Comprehensive suite of leading smart products, professionally installed
- Instant notifications to your smartphone when there is an issue in your home
- LTE Cellular connection used for external communications and Z-Wave technology leveraged for in-home communications\*
- Customizable automation settings that will fit your family's needs
- Robust and secure communication network between smart products and hub
- Video storage\*\*
- Live agent support seven days a week

Simple to use mobile app for all devices

\*video cameras use homeowners wifi.

\*\*available with a worry free package only.

amazon alexa

## SMARTER HOME AUTOMATION

With Enercare Smart Away, you can automate your home based on your location. Simply set your home location so that certain actions take place when you leave that area. For instance, if you leave your home without locking your front door, you can set your mobile app to notify you, enabling you to lock the door from wherever you are. You can also set your thermostat to turn down the heat when you leave your home. You can even set a work location so that your home knows when you're on your way: have the heat turn back up or lamps turn back on when you leave work, so your home is comfortable when you return.

## SMARTER HOME CUSTOM SCENES

Imagine being able to control your home with just one tap on your mobile app using scenes that let you adjust multiple Smarter Home products simultaneously. Create custom scenes for your lifestyle that can change your home's temperature, turn on or off lights, lock doors, etc. Plus, you can set up scenes to work with Smart Away to make your home even smarter.

## SMARTER HOME ENERGY SAVINGS

Track your energy usage, turn off devices and adjust your home's temperature simply and easily through the mobile app. Take it one step further and see what devices, appliances or electronics in your home are consuming the most energy using Smarter Home plugs, switches and energy management clamps. Setup scenes so you can start saving by turning off items when they aren't needed.

Enercare Smarter Home includes an energy usage dashboard that allows you to calculate estimated savings using the current electricity rate of your provider.

## SMARTER HOME PERFORMANCE MONITORING

Using the data that comes through your Smarter Home Hub, the Performance Monitoring System will look at both short and long-term patterns in your HVAC equipment and interpret the information, alerting you if there is an issue - for instance, a decline in the efficiency of your equipment that may require maintenance.

## Enercare **Smarter Home™** Starter Package Includes\*:

### **Smarter Home Hub**

The core of the Enercare Smarter Home network. The Smarter Home Hub is what collects and analyzes the data from all your home devices, making sense of the information and then sending it out to your mobile app so you can control all of your Enercare Smarter Home products.

### **Smarter Home Thermostat**

Control the heating and cooling of your home, even when you're not around. In addition to the easy-to-set thermostat in your home, you can also set your home's temperature remotely on your desktop or within the mobile app.

### **Smarter Home HVAC Performance Monitoring**

Using the data that comes through your Smarter Home Hub, the Performance Monitoring System will look at both short and long-term patterns in your HVAC equipment and interpret the information, alerting you if there is an issue—for instance, a decline in the efficiency of your equipment that may require maintenance.

### **Smarter Home Water Leak Sensor**

Know about water leaks before they have a chance to do significant damage. Leak sensors can be placed under a sink, near your water heater and around the dishwasher or washing machine, to alert you on your app if there's a leak in the area.

Enercare will be calling you to book your installation.

## WHOLE HOME PRODUCTS

### Smarter Home Temperature Sensor

Whether you're losing heat due to a drafty window that needs reinforcing, or burning energy due to a fridge or freezer that's left open or has a leaky seal, you'll be notified on your app of a change in temperature so you can take action.

### Smarter Home Door and Window Contact

Know when doors or windows in your house are opened in real time. Enercare Smarter Home Door and Window Contacts are valuable not only to notify you of someone entering the house, but they can also be placed on gates, cabinet doors or closet doors.

### Smarter Home Water Valve Shut-off

Minimize water damage from leaks. Working in conjunction with the Enercare Smarter Home Water Leak Sensor, Enercare Smarter Home Water Shut-off Valve will turn off the main water valve coming into your house if a leak is detected.

### Smarter Home Smart Socket

Remotely control any electrical device in your house. The Enercare Smarter Home Smart Socket plugs into any 110V electrical outlet in your home, letting you remotely turn on or off appliances, the TV or any other device that's plugged into it.

### Smarter Home Light Switch

Control the lights in your home from anywhere. Whether you want to schedule your lights to come on at sunset when you're on vacation, or just want to avoid fumbling in a dark hallway for a light switch, your Enercare Smarter Home Light Switches are now accessible in the palm of your hand.

## WHOLE HOME PRODUCTS - CON'T

### Smarter Home Energy Management Clamp

Know where your energy is going every month. The Smarter Home Energy Management Clamp is attached to your electrical panel or breaker box to monitor the electrical usage throughout your home.

### Smarter Home Door Lock

Unlock a door remotely for a loved one who has forgotten their keys and never worry that you may have forgotten to lock up when you left the house. It can all be done remotely from your mobile device.

### Smarter Home Garage Door Opener

Never worry about forgetting you left your garage door open after leaving the home. Smarter Home will remind you and provide you the ability to open or close the garage door remotely from anywhere in the world.

### Smarter Home CO Sensor

Carbon monoxide detection for monitoring dangerous levels of gas within your home. If CO is detected the sensor will command the thermostat to turn off the furnace so that gas is not spread throughout the home.

## WORRY-FREE PRODUCTS

**Add a Worry Free Package to your Starter Package for \$6/month + HST for up to 2 Enercare Smarter Home Products\***

### Smarter Home Video Doorbell with Camera

The doorbell camera is activated when your doorbell is pressed, allowing you to see or speak with who's at the door on your mobile device, even if you're not at home. From parcels to deliveries to unexpected guests, the doorbell camera gives you peace of mind that you're opening the door to someone you trust.

### Smarter Home Outdoor Camera

Take comfort in knowing what's going on just outside your home. Check in on kids playing in the backyard even while you're fixing a snack. View suspicious activity in your driveway. Enjoy having the ability to keep an eye on your home's surroundings from wherever you are.

### Smarter Home Indoor Camera

Keep an eye on your home when you're not around. The indoor camera is beneficial for everyday peace of mind. Whether you want to check in on a pet, a child home alone or an elderly loved one that needs continuing care, you can check in and ensure all is well at home on your mobile app.
